-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Re

Art Unit: 1761

1. Claims 9 and 17 are objected to because of the following informalities: Applicant is referred to paragraph No. 5, Paper No. 110804, except that "wherein" (not "where") should be added before "said" in claim 9, line 5. Appropriate correction is required.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-3 and 5-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for reciting "consisting essentially of" (claims 1-3, 5-8, 12-16) or "a fat-free" liquid binder (claims 9-11 and 17).

Corrections are required.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3, 5 and 8-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook et al.

Applicant is referred to paragraph No. 4, Paper No. 110804.

Art Unit: 1761

6. Claims 6, 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook et al as applied to claims 1-3, 5 and 8-16 above, and further in view of La Baw et al.

Applicant is referred to paragraph No. 3, Paper No. 040704 and to paragraph no. 4, Paper No. 110804.

7. Applicant's arguments filed February 22, 2005 have been fully considered but they are not persuasive. Applicant's claimed binder does not patentably distinguish over Cook et al. The binder in Cook et al and in applicant's product does not exist in the final product as a separate and distinct system, but rather is combined with all components and is indistinguishable in the final product. Thus, the fact that Cook et al may use some fat does not enable applicant's claims to patentably distinguish over Cook et al since fat is not entirely precluded from applicant's final product. How applicant characterizes the binder is irrelevant. It is the final product components that are most pertinent, and applicant does not preclude fat as a product component. Similarly, the polyhydric alcohols disclosed by Cook et al are not precluded in applicant's final product. In fact, these are sugar alcohols and provide Cook et al's product with results substantially equivalent to those provided by applicant's sugar component.

Finally, the water content in Cook et al's product is within applicant's claimed range (column 2, lines 44 and 45 of Cook et al).

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can generally be reached on Monday--Friday from 10:30 to 8:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
